

# All Natural Biological Solutions

**From Root Problem to Root Solution**

## **The Root Solution: Organic Solutions**

Your crops most important nutrition and moisture sources are available at the roots. Establishing optimal microbe activity at the roots creates ideal conditions so that crops thrive. Whether your crops are Organic or Conventional, enhancing microbe performance is green, sustainable, 100% natural and organic approved to promote water conservation, plant health, and higher yields. The results are measureable in both crop quality and in increased profits.

## **Plant Health: The Sweet Life**

With more fruit, larger fruit, improved color, and pathogen resistance, crops grown in microbe optimized soil generate more value, more profit, and can use up to 23% less water. See how this safe, 100% natural, pathogen free microbe solution may help you weather any drought.
